Poverty and inequality in Edinburgh: Neighbourhood Partnership profiles

Recent research shows that one in five households in Edinburgh live on incomes below the poverty threshold set by the UK Government. Despite the affluence and success of the city's economy, this is a level of poverty higher than the national average and higher than most other local authorities in Scotland.

Within the city, poverty levels vary considerably between neighbourhoods. In the poorest parts of Edinburgh over 27% of all households live in poverty compared to fewer than 17% of households in more affluent areas.

This profile provides a snapshot of data on poverty and income inequality in the Craigtinny/Duddingston Neighbourhood Partnership area. It is one of 12 similar profiles for all Neighbourhood Partnerships intended to support the development of strategies and action plans to reduce poverty and inequality in our city.

The information presented here is built on analysis carried out for the Edinburgh Partnership Poverty and Inequality Theme Group. More information on the work of this group in the city can be found on the City of Edinburgh Council [website](#).

Each profile contains:

- A short note defining the key poverty indicators used in the report
- Information on the number of households living in poverty in each Neighbourhood
- Information on levels of benefits dependency and other measures of inequality
- Links to other resources and profiles providing information on inequality in each Neighbourhood.

Definitions and data sources

These profiles use the following broad definition of poverty:

“People are said to be living in poverty if their income and resources are so inadequate as to preclude them from having a standard of living considered acceptable in the society in which they live.”

The following four key indicators are used to measure the extent of poverty in each neighbourhood partnership area (NP):

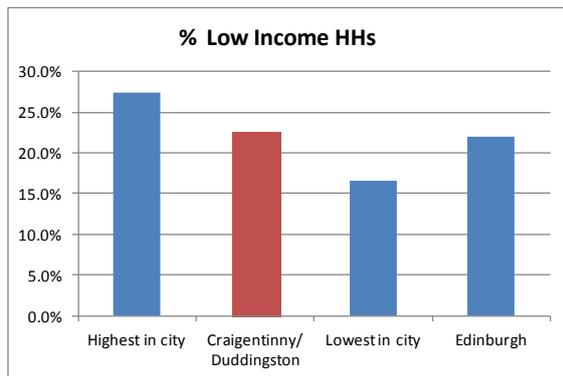

- **Low income Households:** The proportion of households who live on incomes below the poverty threshold (after housing costs). The UK Government defines this threshold as being a level of income below 60% of UK median. For a couple with two children, this threshold is currently estimated at £357 per week. For a single person household, the threshold can be as low as £128 per week.
- **Material Deprivation:** The proportion of households unable to afford a specific set of goods and services regarded as essentials for life in Britain today by a majority of the population.
- **Child Poverty:** The proportion of children (aged under 20) living in households whose income is below the UK Government poverty threshold.
- **Average Weekly Income:** This represents the gross weekly household income.

Data for all of these indicators has been drawn from a 2013 report on income and poverty for small areas across Scotland, commissioned by the [Improvement Service](#) and part funded by City of Edinburgh Council. Detailed information on the results of the research for Edinburgh is available on the Council [website](#).

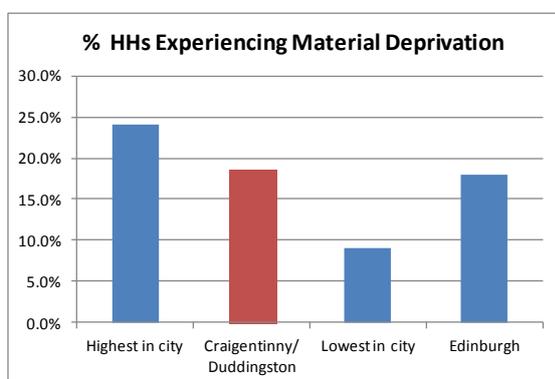

Data presented in the report for these measures relates to the year 2009 and represents a baseline snapshot of poverty in the city. These data represent the most up to date information available for the city on these important indicators.

More current estimates of households on very low incomes are provided by looking at the proportion of adults who receive DWP benefits. The last section of this profile provides an overview of benefits dependency and other measures of inequality in each neighbourhood. Data for this analysis has been drawn from the [NOMIS website](#) and provides information on Department for Work and Pensions (DWP) benefits claimants up to May 2013. Detailed descriptions of the benefits included in the information pack produced to accompany these profiles.

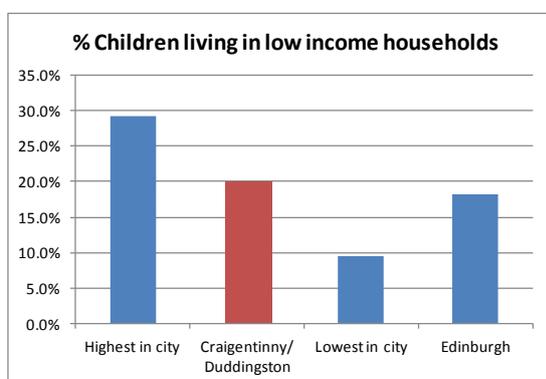

Headline poverty and inequality indicators

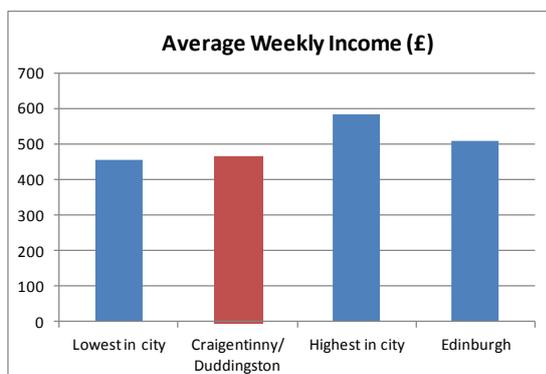

- 2,730 households in the Craigentinny/Duddingston NP area live on incomes below the poverty threshold
- This represents 22.6% of all households in the NP, above the 22% recorded for Edinburgh as a whole
- Craigentinny/Duddingston accounts for 5.5% of all the households in the city and 5.6% of all its low income households

- 2,250 households in the NP experience material deprivation. These households are unable to afford several items regarded by a majority of the population as essentials of life in Britain
- This represents 18.6% of all households in the NP. The NP accounts for 5.7% of all Edinburgh's households experiencing material deprivation

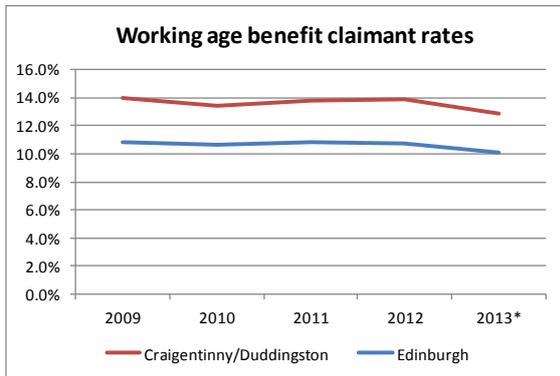

- 940 children in Craigentinny/Duddingston live in households whose income is below the UK poverty threshold
- This represents 19.9% of the population in the age group in the area, a higher rate than the 18.2% recorded for the city as a whole
- Overall, the NP accounts for 5.4% of all the children living in low income households in Edinburgh.

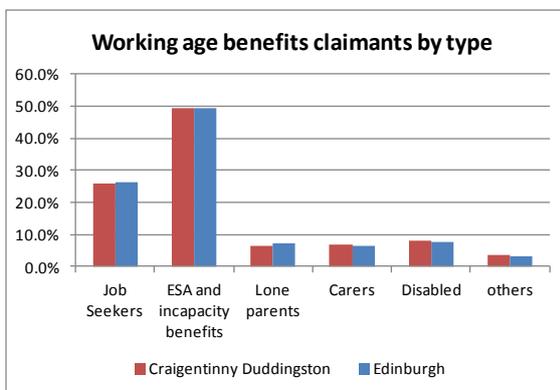

- Average gross weekly household income was estimated at £466 in Craigentinny/Duddingston.
- This is almost 9% below the city wide average of £508 per week (in 2009).

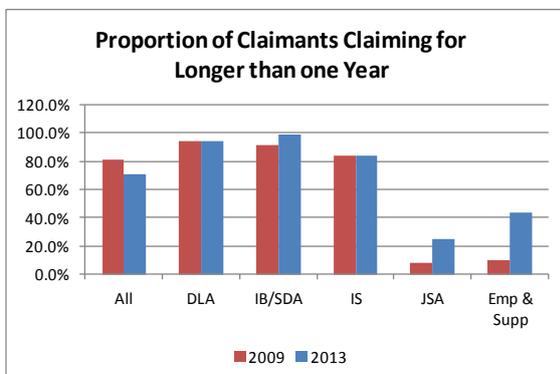

Benefits dependency and other measures of inequality

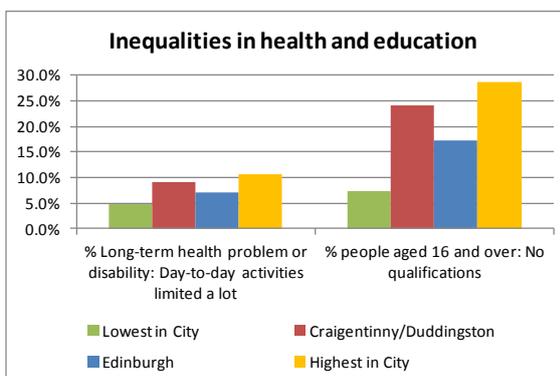

- These figures represent the percentage of working age people who are claiming a range of key out-of-work benefits
- At May 2013, 2,140 (12.9%) people were claiming these benefits compared to 34,175 (10.1%) in the city as a whole
- A detailed definitions for all the benefits included here is included in the information pack which accompanies these profiles

- At May 2013, Job Seekers Allowance and ESA/Incapacity Benefit Claimants accounted for 75.1% of the claimants in the NP, a similar rate to the city as a whole
- The NP recorded rates near the city average for all other categories

- Long term benefits dependency is a useful measure of persistent low income and social exclusion
- The proportion of claimants in the NP receiving benefits for over one year was estimated at 70% in 2013. This was close to the city average rate, but down from the 81% recorded in 2009,
- The period since 2009 has seen a significant increase in long term claimant rates among Job seekers in the NP

- 9% of the population in Craightinny/Duddingston reported a limiting long term health problem or disability in 2011—the third highest rate amongst all NPs in the city; 24% of adults had no qualifications compared to 17.1% in the city as a whole
- The [City of Edinburgh Council](#) website provides a comprehensive insight into a range of Census data
