

## Goals for Hutchie Vale Girls

We are a local based Community sports club who provide weekly football sessions for our girls section. Currently we train at Broomhouse Primary School on their 3G astro facility, however we have no self weighted goals on site and would love to provide these for all our girls sections ranging from 6 to 15 years.

These goals would also be available for any local community groups to use as well as the school children.

This project will help provide regular access to an underused sports facility for young girls in the South-West of Edinburgh. We have engaged with Active Schools in the area and we are looking to capitalise on the popularity of Women's Football by encouraging the young girls of the Broomhouse locale to participate in this healthy activity. This grant will help improve the facility and our sessions by having important equipment in semi-permanent situ.

Our organisation has a proud history of interacting with the local community of the South West of Edinburgh since the 1940's. We have encouraged local children throughout the years to get involved in healthy physical activity. This project is specifically targeted at the young girls of the area and as we expand we will require more equipment in order that we can maintain our aims. Our girls are extremely excited at the prospect of new equipment being provided for them and it will allow an increase in participation time available for their training sessions.
